

IT security depends on you!

better safe than sorry

Leave your desk?
Lock your PC!

Windows key+L
does the job

You never know what happens inside a cloud. Don't use unapproved services like Dropbox, Google Drive etc. for company data!

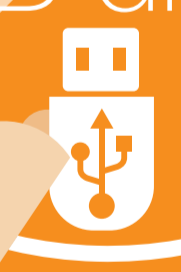

Passwords are like underwear. Change them often, keep them private and don't share with anyone!

PASSWORD

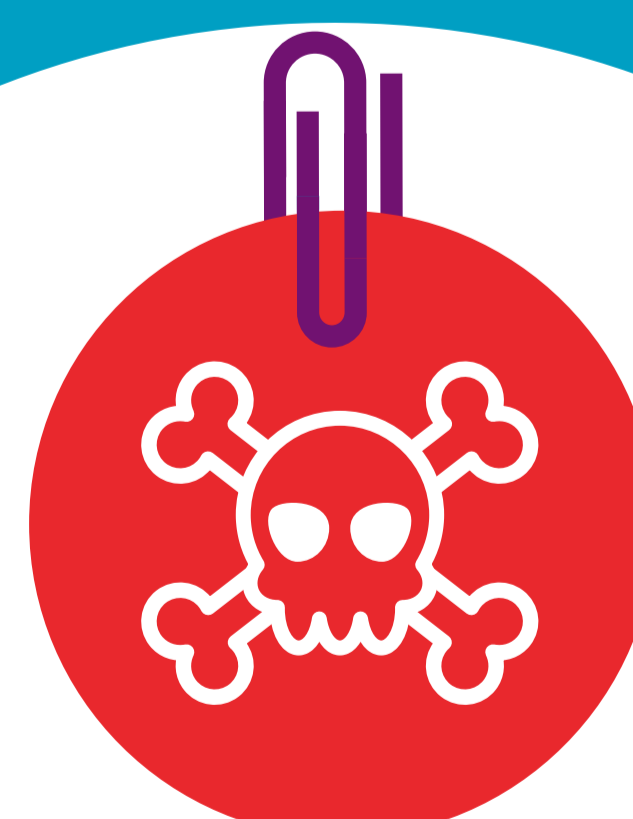

Shred confidential documents!

STOP!
Don't use unencrypted USB drives

click me

Don't open files you are not expecting or click links you don't trust

If in doubt - **ask IT**
